

HOW TO MAKE A TEMPLATE

Templates can be made from old newspaper, brown or wrapping paper or wallpaper. If a single piece is not big enough, then tape pieces together until you get a single sheet of the correct size. Newspaper and wrapping paper are easier to use if you have to tape pieces together as they fold more easily for posting to us.

Fold a blanket or sheet into the shape you want in the space the bed is to go in. When you are happy with the shape you have made, carefully put the folded blanket on top of the paper you are using and draw round it. Cut out the shape you have drawn leaving a wide margin round the line and put the template into the space where the bed will go to check that it is the correct shape. Adjust the shape, if necessary. Trim the template to the lines you have drawn and make a final check that it fits the available space in the way you want.

On the template, write the length of each side. Also write any particular instructions concerning the bed shape. If you want a bolster pillow or pillows, please indicate which side(s) you want it located on. Please also write your name, address and phone number plus the bed type, fabric type and fabric colour on the template. That way if your form and template get separated we can reunite them easily.

Complete the form below and post it, plus the template to:
Big Dog Bed Company, 70 High Street, Wargrave, RG10 8BY.

In addition to posting us the template, feel free to photograph your template and email it along with the completed form to info@bigdogbedcompany.co.uk. That way we can get a quote to you more quickly
